@fintelkai

We now know S&P is a success. The main empirical argument for this is that two very busy, established scholars at the top of our field have agreed to take the reigns. Today, Louise McNally and Kjell Johan Sæbø officially take over as editors-in-chief of S&P. [2/3]

Thanks to everyone for supporting the journal: the editorial team, the LSA as our publisher, the many reviewers, the authors who entrust their work to us, and everyone for reading and citing S&P papers. The field is the better for it. [3/3]
